PROJECT REPORT

CSE0001 – Digital Literacy

Name - Jyotsnangi Shukla

Reg No. - 25MIM10204

Branch - Int.MTECH AI

Year - 2025

Course Code - CSE0001

Date - 31/03/2026

INTRODUCTION

This project shows understanding of digital literacy and its importance in academic and professional aspects . It covers various aspects such as infographic design, digital portfolio creation, coding practice, communication skills, and cyber safety awareness. By doing different tasks, the project shows how students use digital tools but lack awareness about responsible usage and security risks.

The given example in the project reflects real-life situations where students may face challenges related to digital communication, collaboration, and cyber threats. It indicates the difference between using digital platforms and understanding their impact.
Overall this project mainly focuses on how to know technical skills with awarenesses , responsibility among students.

TASK 1

INFOGRAPHIC DESIGN

WHAT I HAVE MADE ?

I have made an infographic design or template on the topic “Digital Literacy Essentials For Students”.

WHAT TOOLS I USED ?

I have used the “Canva” design tool as an app and in that I have used template infographics for the design I have made.

WHAT DOES IT SHOWS ?

The design shows questions regarding digital literacy and their answers which clears as well helps to master the subject.

Following is the questionnaire :

Digital Literacy Basics ?

Here it tells how to use digital tools not just technically but also responsibly.

Useful Digital Tools ?

Platforms such as Google Docs , Canva , Github along with learning apps help to improve productivity and experiences.

Safe Internet Practices ?

Protection of data by using strong password and two step authentication. By not opening suspicious accounts or links.

Professional Online Presence ?

By maintaining a clean and genuine profile on online platforms like Linkedin and Github to enhance career opportunities.

Email Etiquette ?

Write clear subject lines ,using polite and professional language which create a good impression .

REFLECTION

The thing I realize while making this infographic is that there is a difference between using digital tools and actually being digitally aware. Also it was a little bit challenging to present all

the information in a short and clear format. Overall, this task helped me improve both my understanding and presentation skills

TASK - 2

DIGITAL PORTFOLIO

PLATFORME USED :

1. LINKEDIN
2. GITHUB
3. KAGGLE

PURPOSE :

LINKDIN

It is used to create a professional online platform for finding jobs or internship opportunities. Also helpful for finding industry trends and skillful people.

GITHUB

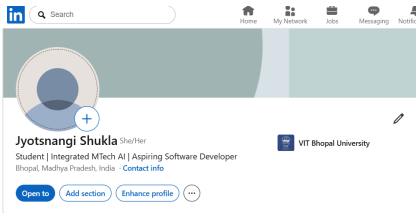
It is used to save and share coding projects. It helps to collaborate with others which helps to create a strong portfolio .

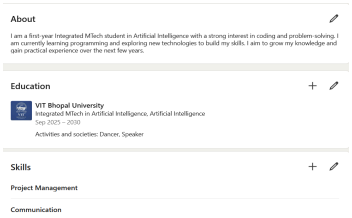
KAGGLE

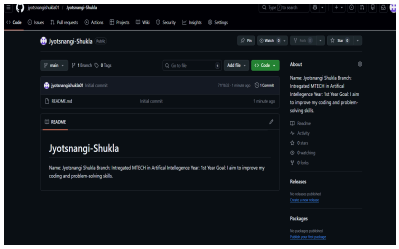
It is used for learning and practicing data science / machine learning.It provides datasets, coding notebooks, and competitions where students can improve their analytical and problem-solving skills.

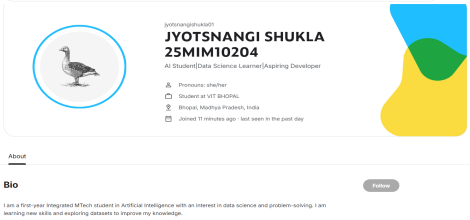
FUTURE PLANS :

In these four years, my plan is to actively use GitHub to upload my projects and for improving my coding abilities, also for LinkedIn to connect with professionals as well as explore internship opportunities. I will use Kaggle to enhance my analytical and problem-solving skills. due to which it will help me grow professionally and prepare me for future career opportunities









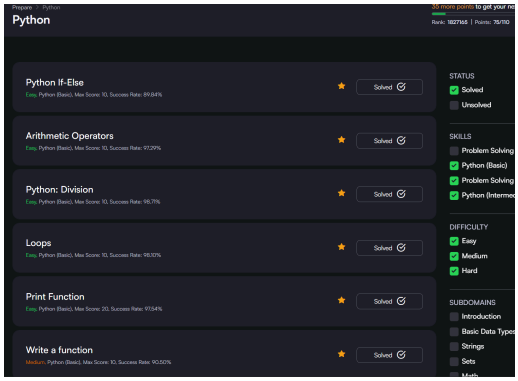
TASK - 3

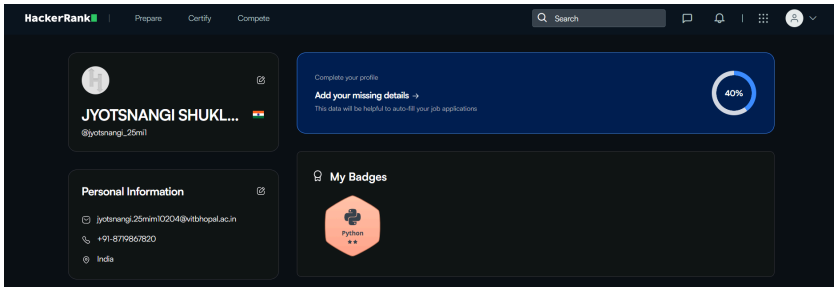
EXPLORE CODING & COLLABORATION PLATFORMS

Part - A (Coding Practice)

For coding practice I used “HackerRank”, and got two stars for python language .

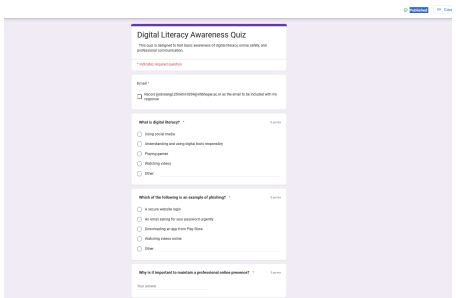
Solved the beginner level which contains python basic , intermediate problems along with problem solving (advanced).

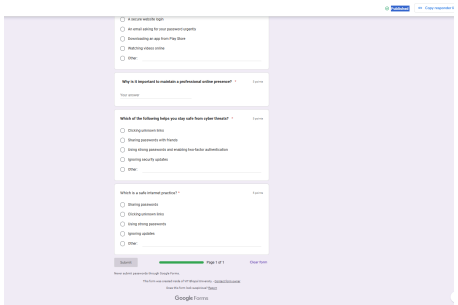


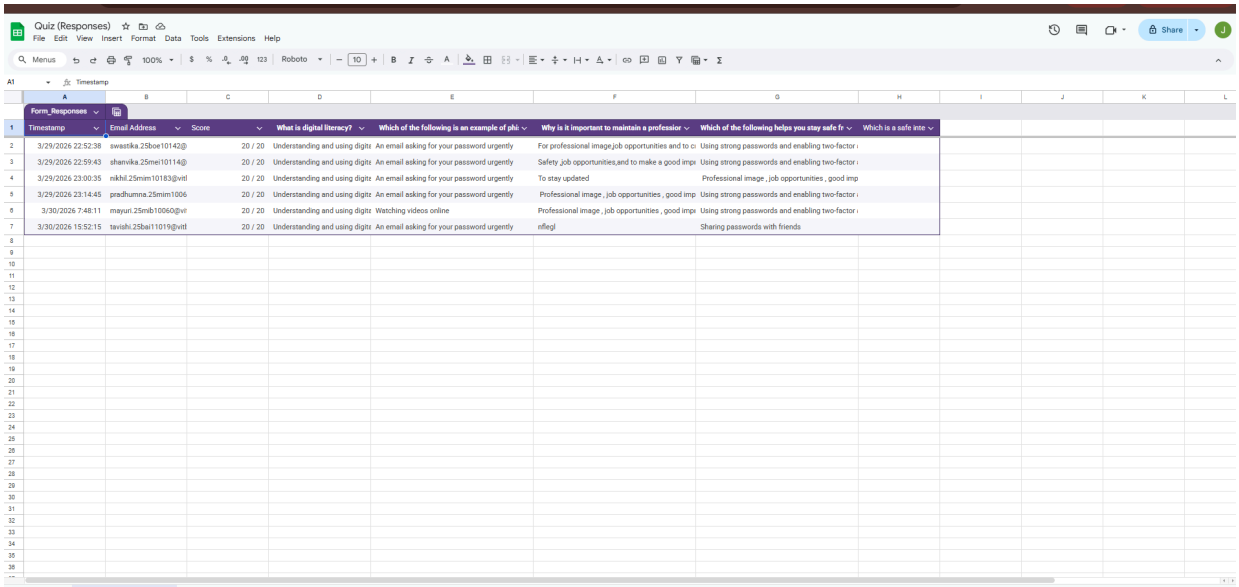


Part - B (Google Workspace Collaboration)

Created a google form containing 5 questions that have 4 Mcq and one short answer question named as “Digital literacy awareness quiz “. I have given 5 questions based on this topic to know whether my fellowmates are aware of digital awareness and also this helps me to recheck my knowledge about it .







Quiz (Responses)

Form_Responses

Timestamp	Email Address	Score	What is digital literacy?	Which of the following is an example of phi	Why is it important to maintain a professior	Which of the following helps you stay safe fr	Which is a safe inte
3/29/2026 22:52:38	swastika.25boe10142@	20 / 20	Understanding and using digita	An email asking for your password urgently	For professional image,job opportunities and to ca	Using strong passwords and enabling two-factor	
3/29/2026 22:59:43	shanvika.25mei10114@	20 / 20	Understanding and using digita	An email asking for your password urgently	Safety ,job opportunities,and to make a good impa	Using strong passwords and enabling two-factor	
3/29/2026 23:00:35	nikhil.25mim10183@vitl	20 / 20	Understanding and using digita	An email asking for your password urgently	To stay updated	Professional image , job opportunities , good imp	
3/29/2026 23:14:45	pradhumna.25mim1006	20 / 20	Understanding and using digita	An email asking for your password urgently	Professional image , job opportunities , good imp	Using strong passwords and enabling two-factor	
3/30/2026 7:48:11	mayuri.25mib10060@vit	20 / 20	Understanding and using digita	Watching videos online	Professional image , job opportunities , good impa	Using strong passwords and enabling two-factor	
3/30/2026 15:52:15	tavishi.25bai11019@vitl	20 / 20	Understanding and using digita	An email asking for your password urgently	nflegl	Sharing passwords with friends	

HOW THEY ARE HELPFUL ?

It helped me to improve my problem-solving skills and to understand basic programming concepts. It also helped me to have some practical experience in coding and helped me build confidence.

For collaboration, I used Google Forms and created a Digital Literacy Awareness Quiz. This helped me understand how to design questions and collect responses efficiently. The linked Google Sheet allowed me to analyze responses easily.

These platforms are very useful for academic growth. Coding platforms help in developing logical thinking and technical skills, while collaboration tools improve communication and teamwork. In the future, I will continue to use these tools to enhance my skills and will be preparing for better career opportunities.

TASK - 4

DIGITAL COMMUNICATION

Poor digital communication can lead to misunderstandings and sometimes missed opportunities. For example, a student who has sent an informal email to a professor requesting for a recommendation without a proper subject line, greeting, or explanation due to which the message appeared to be rude and unclear, which resulted in a delayed response and a negative impression of the student in front of the professor.

if the students use a clear subject line, polite tone, and proper structure the situation could be different. In place of that student should have introduced themselves, explained the purpose of the email, and respectfully requested assistance.

This example shows that professional communication plays a vital role in digital environments. Clear, polite, and well-structured communication helps in building a positive impression and increases the chances of receiving a helpful response.

COMMUNICATION SCENARIO

For example : A student needed a recommendation from a professor for an internship. He sent a very short and informal email saying “Hi sir, send recommendation asap.” This email did not include a subject line, proper greeting, or explanation. Because of this, the professor did not respond positively and the interaction felt unprofessional.

This situation shows how informal communication can create a negative impression in formal situations . Even though the student’s intention was clear, the way it was written made it seem careless and disrespectful.

KEY LEARNING

From this scenario, I have learned that professional communication is very important in academic as well as in work environments. Also a proper email should always include a clear subject, polite greeting, and complete explanation of the request.

This makes me understand that the tone matters a lot. Using respectful language and showing respect can create a positive impression. Quick and informal messages may be acceptable with friends, but not in professional situations.

Therefore, I realized that clear, polite, and well-structured communication can help in building better relationships and also increases the chances of getting a positive response.

TASK - 5

CYBERCRIME AWARENESS & PREVENTION

MY EXPERIENCE :

While researching this topic, I was most surprised by how easily people fall for cyber scams, even when they are aware of basic safety rules. I realized that many frauds do not use advanced techniques but instead take advantage of human behavior, such as acting quickly without thinking or trusting messages that create urgency.

ACTIONS :

One habit I will personally change is that I will stop responding immediately to unknown messages or links. Instead, I will take time to verify the source before taking any action. I will also be more careful about sharing personal information online.

This has helped me more aware that staying safe online is not just about knowledge, but about applying it in real situations.

CONCLUSION

Overall, this project helped me to understand that digital literacy is not just about using tools but also about being responsible, aware, and professional in the digital world. It helped me to learn the importance of maintaining a proper online presence, interacting collaboration, and staying safe from cyber threats. It also makes me aware to improve my practical skills through coding and collaboration platforms (especially that are mentioned in project). This experience has made me more careful and confident in using digital technologies in both academic and real-life situations.
